Professionalism from the Ground Up.

Engineering, Constructing, and Commissioning Poland's Critical Infrastructure.

Exquisite Spaces Sp. z o.o. | Corporate Capability Profile

Exquisite Spaces

The Standard Model:
Fragmented execution, equipment rental delays, and subcontractor unreliability.

The Exquisite Spaces Model:
100% In-House Control.

We do not rely on subcontractors. From groundbreaking earthworks to final electrical commissioning, we own the fleet, we employ the experts, and we guarantee the timeline.

Exquisite Spaces

The Architecture of Independence.

Massive Owned Fleet

Completely independent of rental markets and logistics bottlenecks.

In-House Certified Experts

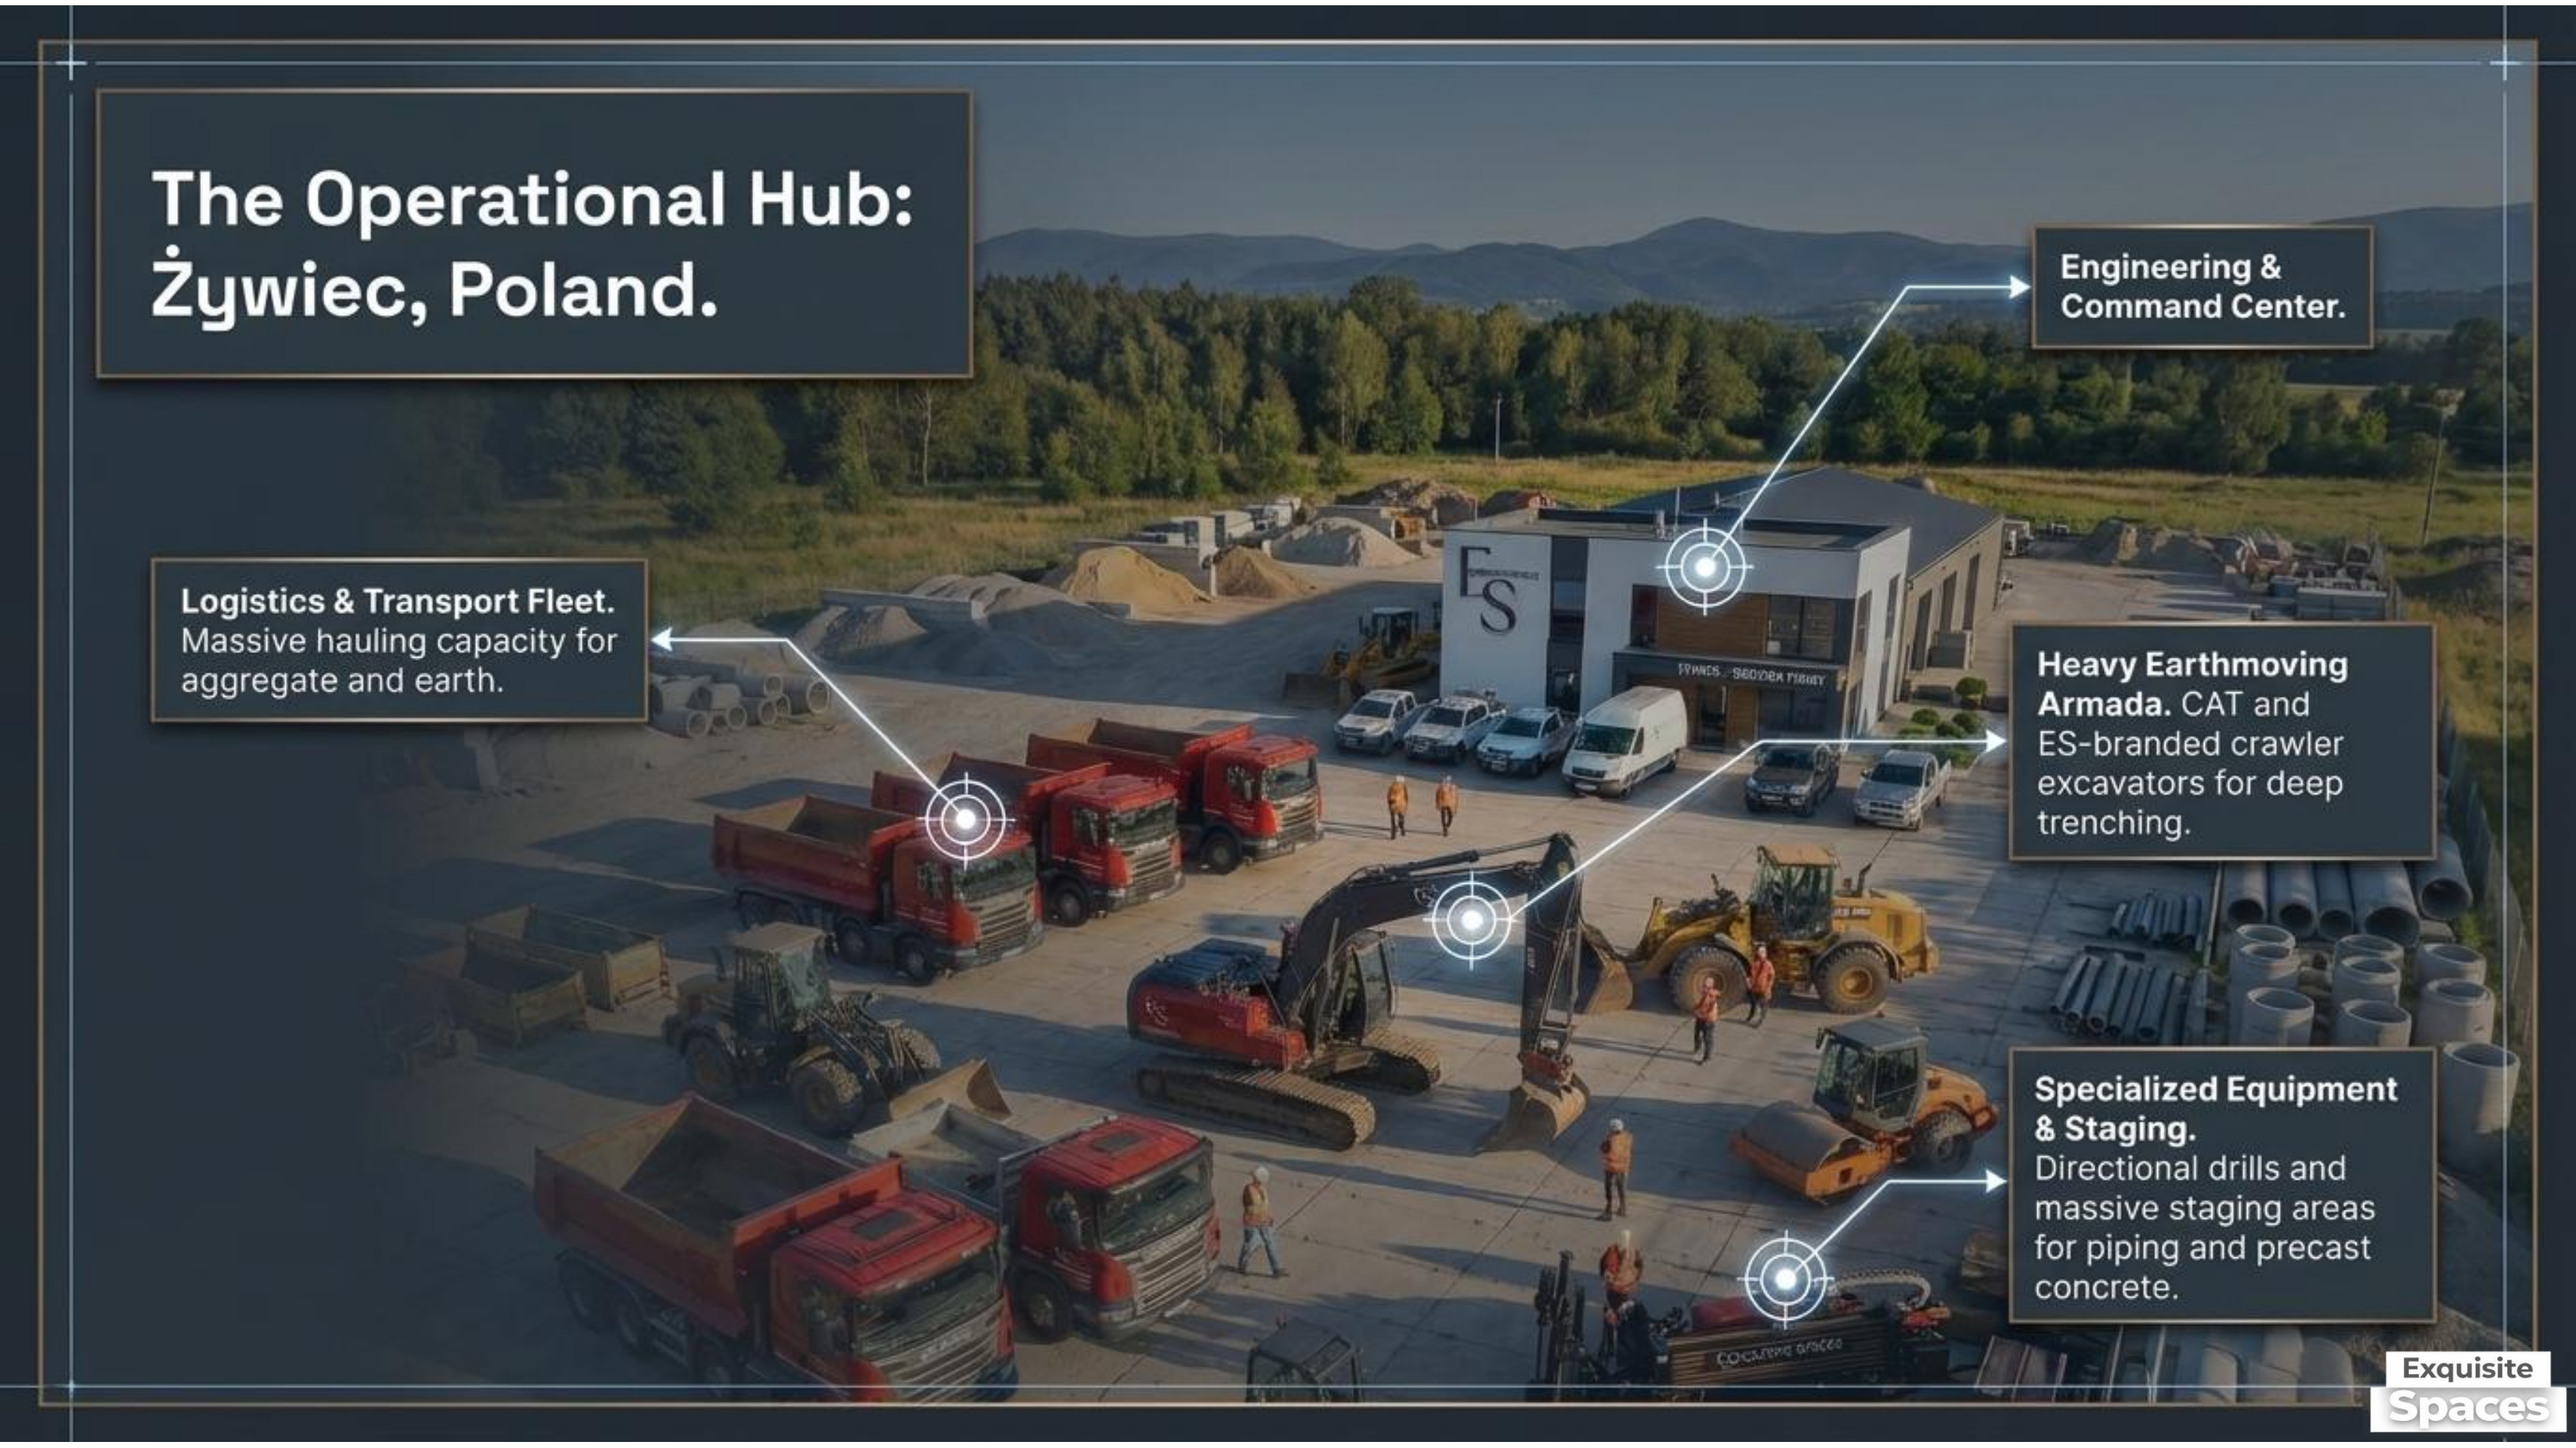
Engineers, SEP-certified electricians, and licensed gas fitters on payroll.

Zero Delays

Uncompromising flexibility, strict safety compliance, and total accountability for every phase of the build.

Exquisite Spaces

The Operational Hub: Żywiec, Poland.



Exquisite Spaces

A Purpose-Built Arsenal.

Heavy Earthmoving

Featuring CAT 336 crawler excavators, heavy loaders, and rollers.

Purpose: Highway-side deep trenching and massive site leveling.

Precision & Trenchless

Featuring directional drilling rigs, CAT miniexcavators, and laser levels.

Purpose: Non-invasive pipe laying and millimeter-accurate railway drainage.

Integrated Logistics

Featuring a dedicated fleet of Scania heavy tippers and Mercedes Sprinter brigade vans.

Purpose: Uninterrupted material supply and rapid specialized team deployment.

Exquisite Spaces

Licensed Experts at Every Level.

4+ Years of corporate growth built on decades of individual industry experience.

Exquisite Spaces

The Integrated Infrastructure Ecosystem

Gas Networks

Industrial & Municipal builds/modernization

Water & Sewage

Complex gravity lines and pressure networks

Railway Drainage

PKP/PKM specialized drainage systems

Telecom & Fiber Optics

Directional drilled network lines

Electrical Installation

Industrial commissioning via SEP experts

Exquisite Spaces

Engineered for Extreme Versatility.

Challenge	ES Solution
Active Railway / Mountain Terrain.	CAT Miniexcavators + Laser Leveling + Railway Certified Supervisors.
Deep Trenches / National Highways.	CAT 336 Heavy Excavators + Scania Tipper Fleet.
Non-Invasive Urban/Road Crossings.	In-house Directional Drilling Rigs.
Multi-Branch Industrial Site Prep.	Simultaneous deployment of Earthmoving, SEP Electricians, and Gas/Hydro Fitters.

Exquisite Spaces

Proven Nationwide Execution.

100+

Major Infrastructure Projects successfully delivered across the European Union & UK.

- Unbroken track record of timeline adherence.
- Trusted by municipal governments and industrial developers.
- Seamless transition across international borders and diverse terrains.

Exquisite Spaces

Precision in Restricted Corridors.

Project: Railway Infrastructure Drainage – Beskidy

The Challenge:

Executing complex drainage infrastructure alongside active, electrified PKP railway lines in mountainous terrain.

The Execution:

Deployed nimble CAT miniexcavators and
Deployed nimble CAT miniexcavators and
laser-guided leveling to work within strict spatial constraints without disrupting rail operations.

Exquisite Spaces

Dominating Massive Earthworks.

Project: Trunk Pipelines & Large-Scale Water/Sewage Networks.

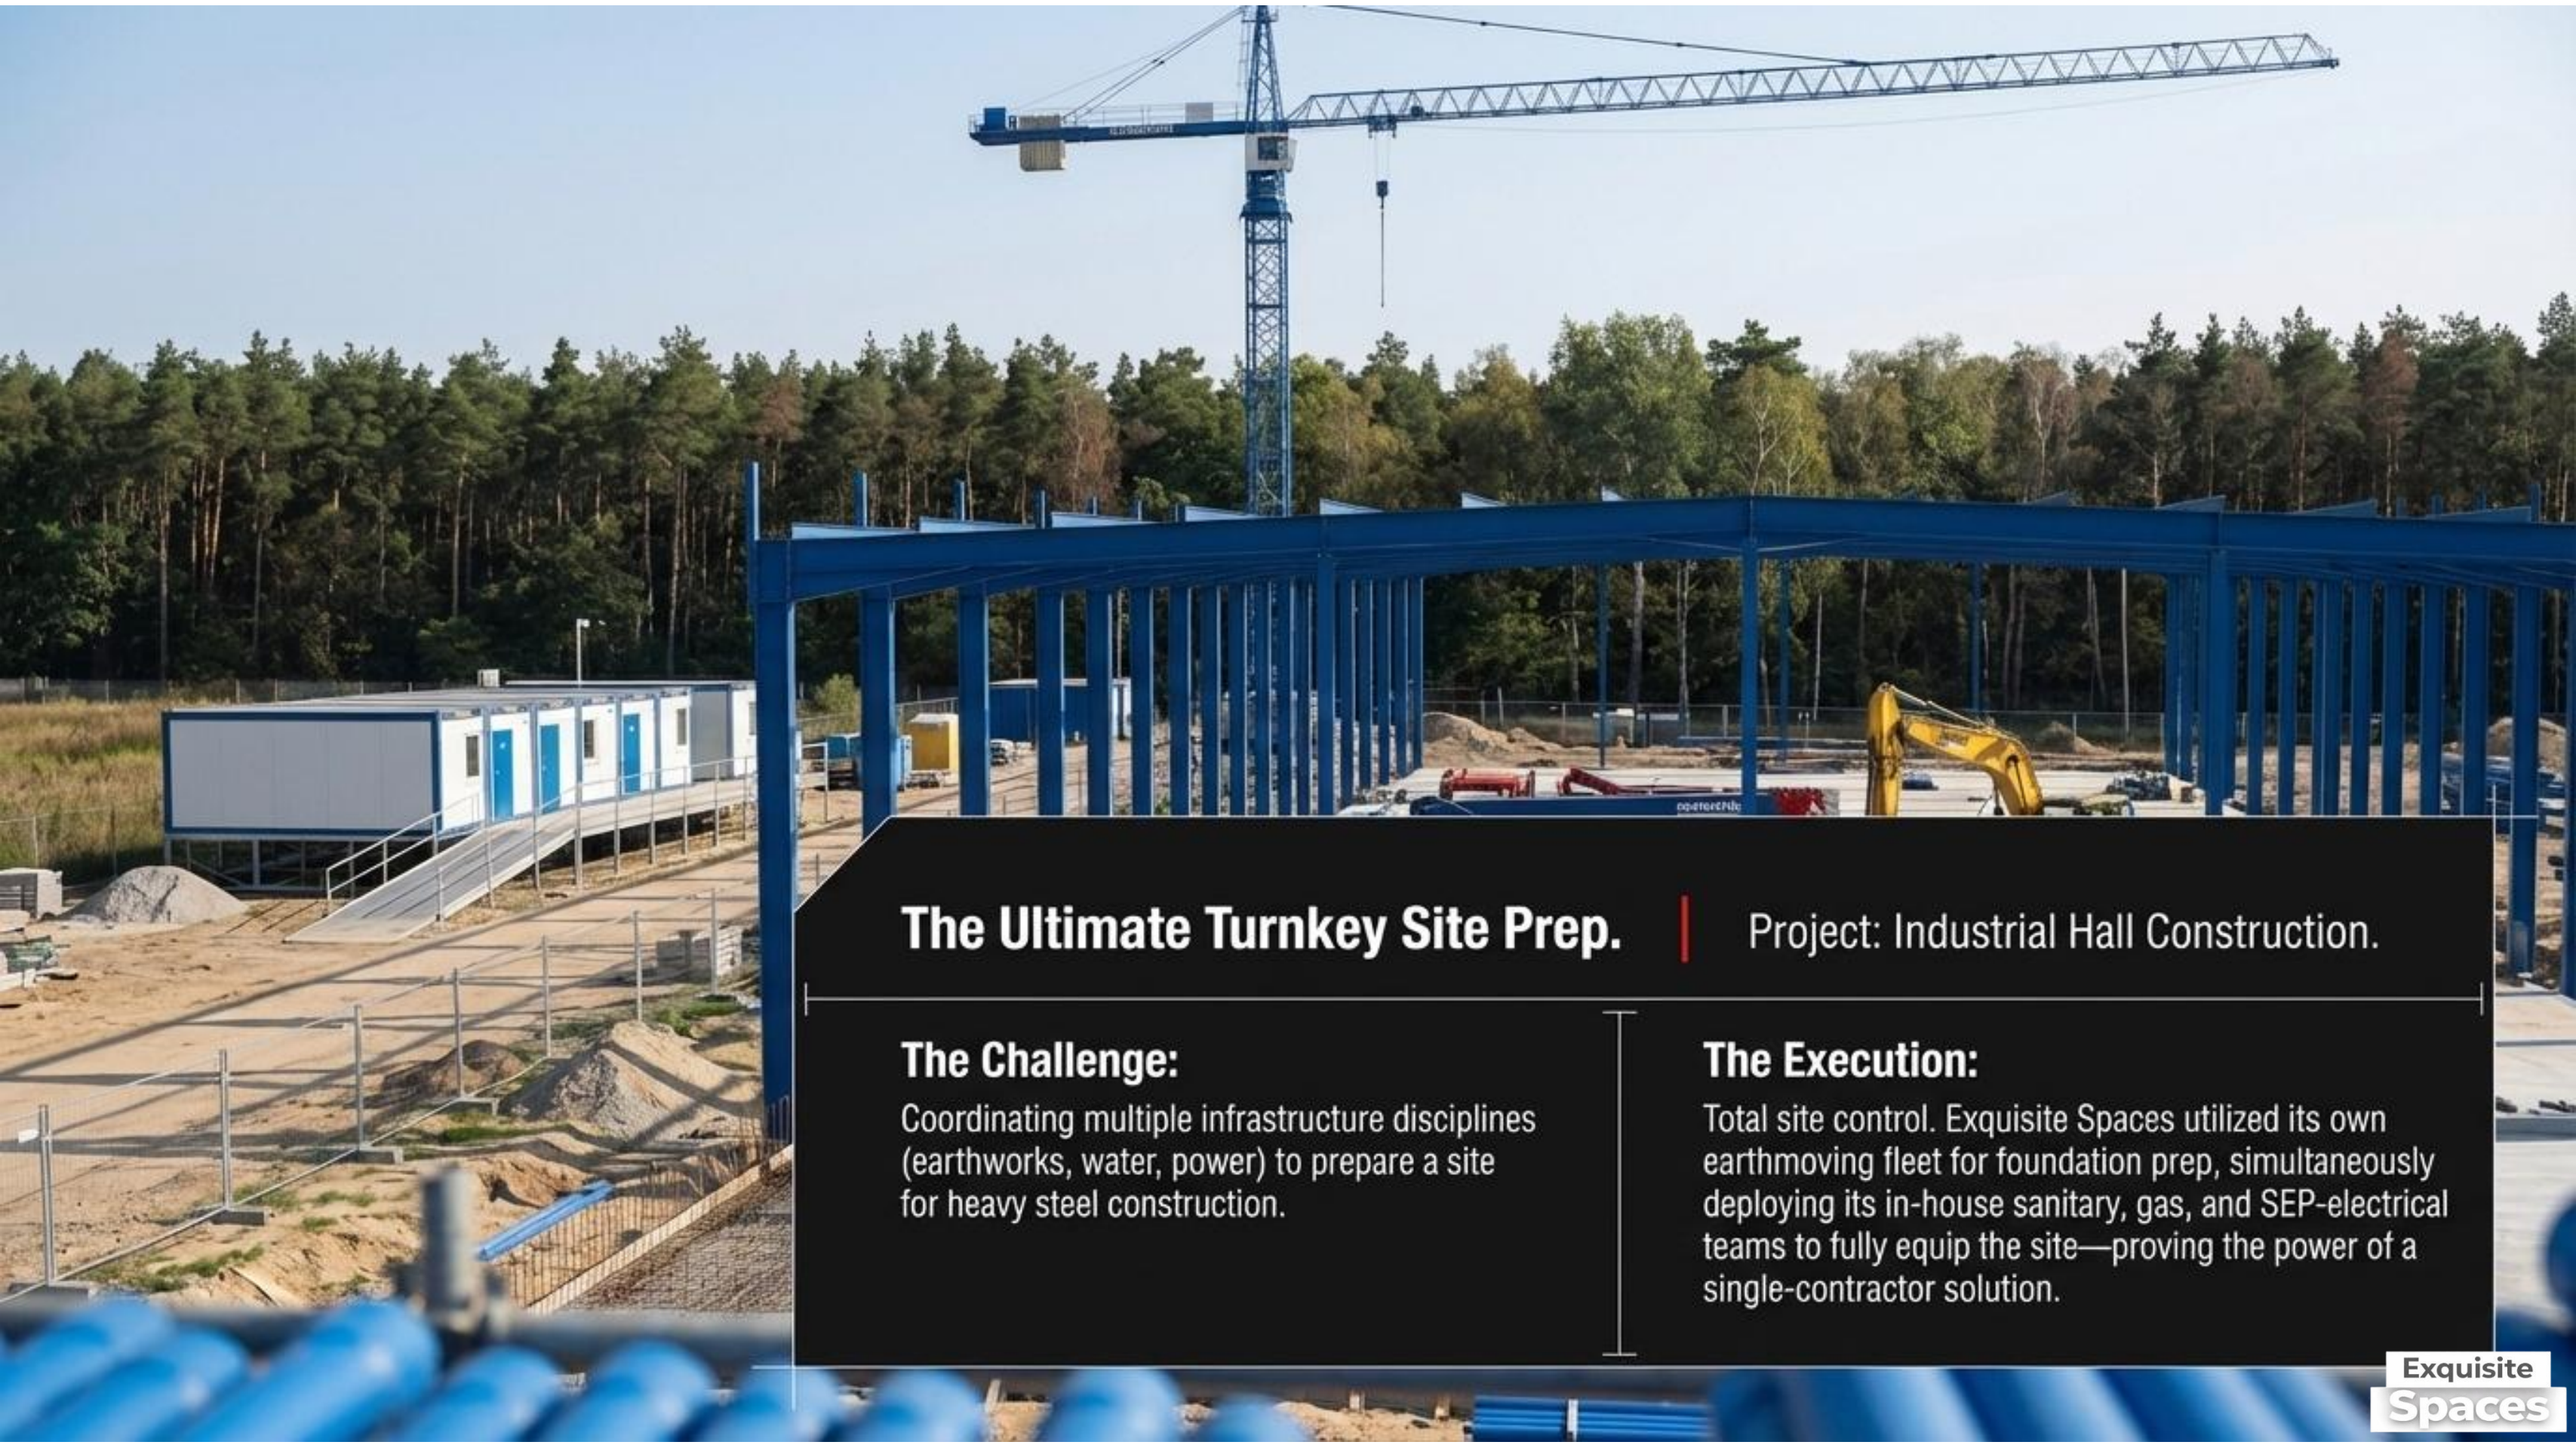
The Challenge:

Moving thousands of tons of earth and laying massive concrete infrastructure alongside active national roads.

The Execution:

Synchronized deployment of the heavy CAT 336 crawler excavators, directional drilling rigs for road-crossings, and the continuous loop of the Scania logistics fleet for rapid material extraction.

Exquisite Spaces



The Ultimate Turnkey Site Prep.

Project: Industrial Hall Construction.

The Challenge:

Coordinating multiple infrastructure disciplines (earthworks, water, power) to prepare a site for heavy steel construction.

The Execution:

Total site control. Exquisite Spaces utilized its own earthmoving fleet for foundation prep, simultaneously deploying its in-house sanitary, gas, and SEP-electrical teams to fully equip the site—proving the power of a single-contractor solution.

Exquisite Spaces

Build with Uncompromising Certainty.

Partner with the infrastructure contractor that owns the fleet, employs the experts, and guarantees the result.
